SUBJECT MATTER AND SECTION DEFINITIONS

Statement on Subject Matter applicable to all sections

The fundamental rule that must be observed at all times and applies to all sections offered in exhibitions with FIAP patronage is that the welfare of living creatures is more important than any photograph. This means that

practices such as baiting of subjects with a living creature and removal of birds from nests, for the purpose of obtaining a photograph, are highly unethical, and such photographs are not allowed in any exhibition with FIAP patronage recognition. Under no circumstances may a living creature be placed in a situation where it will be killed, injured or stressed for the purpose of obtaining a photograph. This rule applies regardless of whether or not the creature being killed, injured or stressed is visible in the captured image.

There are also concerns about the use of aerial photography, drones, helicopters, low flying aircraft. These should not cause any interference with other individuals or animals which causes a disturbance in their normal activity or disrupt the way any individuals or animals interact with their environment.

Entry in this exhibition is conditional on accepting these policies. The content of images must comply with these General Conditions and with the Division and Section definitions listed in these conditions. Images that - in the sole opinion of the judges or the Exhibition Organizers - do not comply, will be disqualified so the entrant may be aware of the problem when considering entry into other exhibitions with FIAP patronage recognition.

FIAP Definition of the black and white photography (monochrome)

A black and white work fitting from the very dark grey (black) to the very clear grey (white) is a monochrome work with the various shades of grey. A black and white work toned entirely in a single colour will remain a monochrome work able to stand in the black and white category; such a work can be reproduced in black and white in the catalogue of a salon under FIAP Patronage. On the other hand a black and white work modified by a partial toning or by the addition of one colour becomes a colour work (polychrome) to stand in the colour category; such a work requires colour reproduction in the catalogue of a salon under FIAP Patronage.

FIAP Nature definition

Nature photography records all branches of natural history except anthropology and archaeology. This includes all aspects of the physical world, both over water and underwater.

Nature images must convey the truth of the scene. A well-informed person should be able to identify the subject of the image and be satisfied that it has been presented honestly and that no unethical practices have been used to control the subject or capture the image. Images that directly or indirectly show anything human activity threatening a living organism's life or welfare are not allowed.

The most important part of a Nature image is the nature story it tells. High technical standards are expected, and the image must look natural.

- Objects created by humans, and evidence of human activity, are allowed in Nature images only when they are a necessary part of the Nature story.
- Photographs of human-created hybrid plants, cultivated plants, feral animals, domesticated animals, human-created hybrid animals, and mounted or preserved zoological specimens are not allowed.
- Photographs made where the scene is natural and the animal is unharmed in a carefully managed environment environment, such as Zoo, rescue centers, and ethically managed natural environment farms are permitted.
- Attracting or controlling subjects through the use of food or sound for the purpose of photographing they are not allowed. Maintained situations such as provided supplemental food due to hardship caused by weather conditions or other conditions beyond the animals' control, where photography is incidental that the feeding of the animal does not fall under this provision.
- Controlling live subjects by chilling, anesthetic, or any other method of restricting natural movement for a photograph is not allowed.
- Human-made elements shall be permitted under the following circumstances:
 - a) When they are an integral part of the nature story, such as a songbird singing atop a fence post manmade object used as nest material, or a weather phenomenon destroying a man-made structure.

b) When they are a small but unavoidable part of the scene, such as an unobtrusive footprint or track in the background.

c) Scientific tags, collars, and bands are specifically allowed.

When photographing at a zoo, sanctuary, or rehabilitation center, it would be understood that the photographer ensured that it's properly accredited and conforms to best practices.
